SINCE 1975
**FROM THE SEA
TO THE TABLE**

Passion and Expertise on a Journey Across the Sea

1975

The Beginning of a Passion

One of Turkey's first frozen seafood facilities was founded in Adana under Pakyürek A.Ş., with the vision of carrying the abundance of the sea across the country.

1990s

Strength from the Sea

The production facility expanded to 40,000 m², increasing capacity and female employment. The power of the sea united with the strength of women.

2000s

The Birth of mezzeMarin

Building on decades of export experience, the mezzeMarin brand was born. The rich flavors of the sea now reached not only international markets but also homes across Türkiye.

2006

International Success

At the Moscow Fair, mezzeMarin's Marine Hamsi and Marine Smoked Mackerel received the Gold Medal. The brand's Marine Çiroz and Octopus Skewer products reached the finals, marking global recognition for Turkish seafood.

2010-2020

Strong Steps in HORECA

mezzeMarin expanded to over 20,000 sales points and 16 export countries, taking the taste of the sea beyond borders. During this period, the brand also entered major retail chains, bringing its products directly to consumers.

2022

A New Era: mezzeMarin Online

With the launch of mezzeMarin Online, the brand embraced the digital transformation era. This step built a direct connection between mezzeMarin and consumers, introducing freshness, convenience, and a new wave of innovation to the seafood industry.

TODAY

From Sea to Table,

Over 50 years of experience, 300 dedicated employees, and 80% female workforce... mezzeMarin continues to keep passion, craftsmanship, and the pure essence of the sea to every table.

VISION

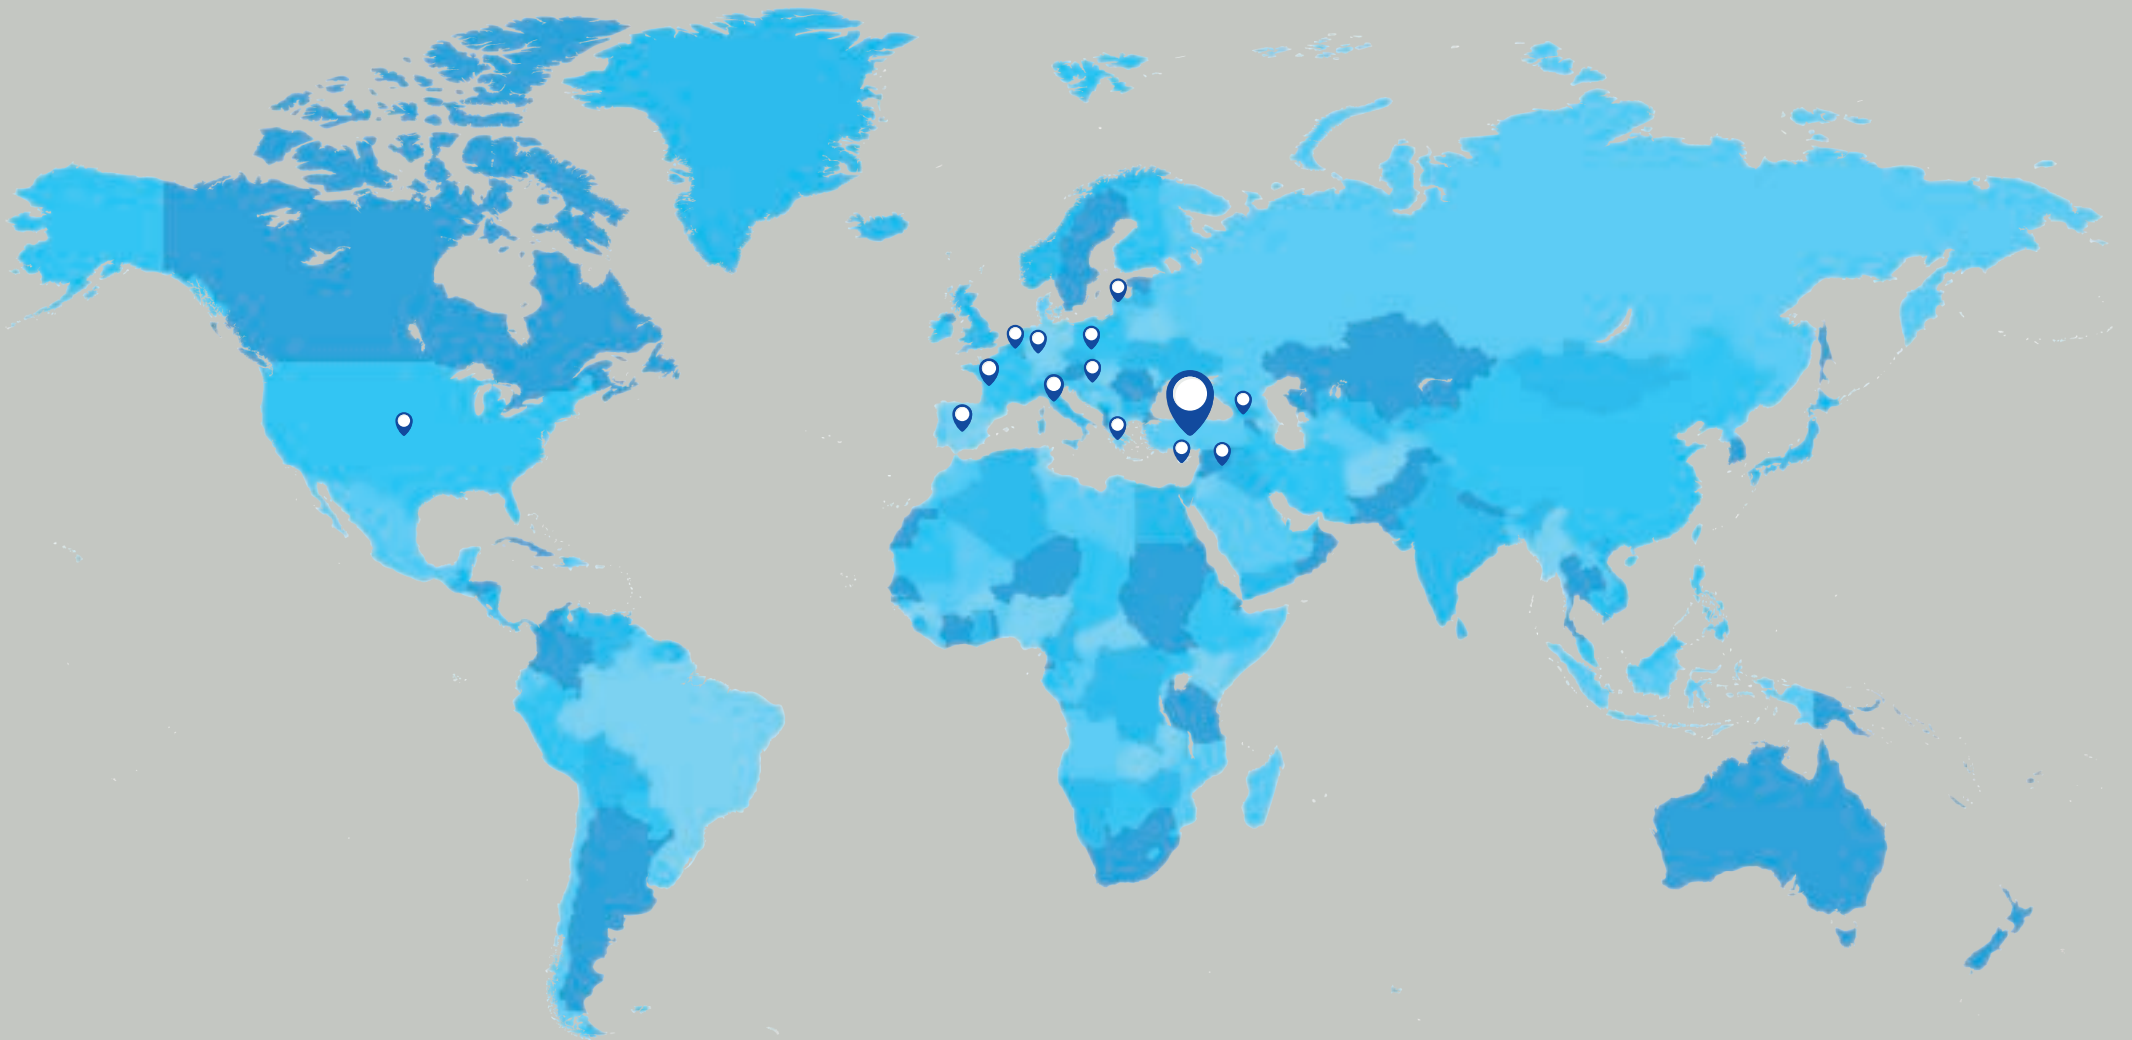

- 🐟 To bring the purest flavor of the sea to every table with confidence and freshness.
- 🐟 To ensure the continued happiness of consumers and stakeholders.

MISSION

- 🐟 To be the leading brand that brings Turkish seafood to global tables.
- 🐟 To maintain the cold chain from sea to table and present it as "safe food."

OUR EXPORT POWER

mezzeMarin Sustainability Manifesto

Circular Economy & Waste Management

Preventing waste is a core principle of our production approach. We manage waste through professional partnerships and systematically integrate recycling and reuse practices into our operations.

Our target is Zero Carbon Footprint

Our facilities operate with solar energy panels and renewable power sources. We constantly measure our carbon footprint and regularly implement improvement actions to reduce it.

Water Conservation and Efficient Use

We value water as a precious resource and develop projects to increase efficiency. Water conservation is an inseparable part of our business processes.

Women's Employment and Social Contribution

Women make up 80% of our workforce not only a number, but a symbol of empowerment. We proudly serve as a leading force of women's active participation in the economy and strengthen social inclusion through projects that support disadvantaged groups

Innovation, Digitalization, and Global Impact

We continuously improve our product range and production processes. Through our digital platform [mezzeMarin.online](https://mezzemarin.online), we take innovative steps toward expanding exports and building global connections.

Our After-Sales Service Philosophy

For us, sales don't end at the checkout counter — they begin at the table.

Our promise is clear: As strong as our cold chain, as reliable as our support.

Quick Response

We evaluate every request within the same business day and determine the best course of action.

Transparent Traceability

Through batch and lot tracking, we monitor every product from dispatch to delivery, reviewing temperature and transportation data along the way.

Uncompromised Safety

Consumer health takes priority. If any problem is detected within the cold chain,

We immediately activate replacement or return procedures.

On-Site Support (HORECA)

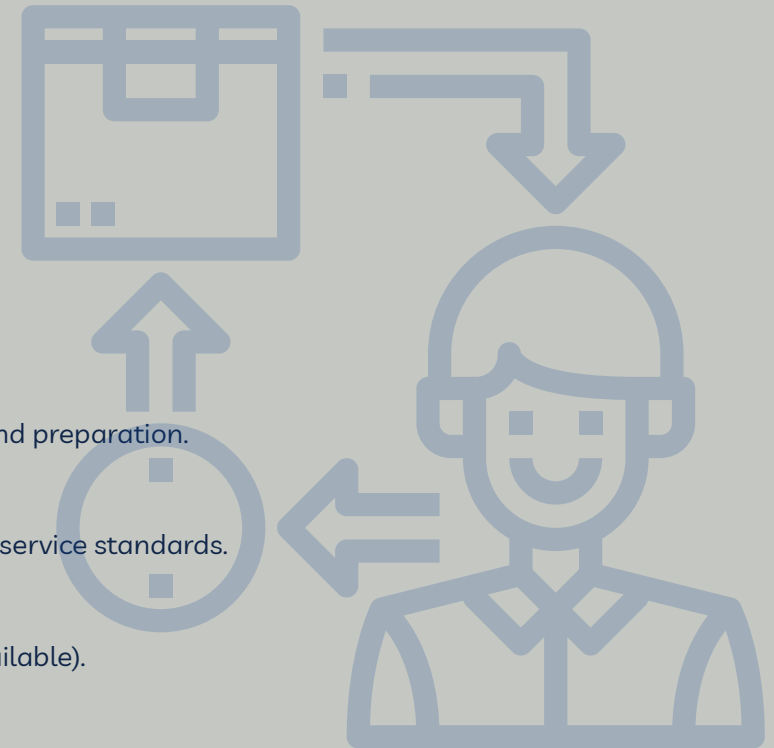

We offer chefs and businesses short training sessions and mini guides on product handling, storage, and preparation.

Continuous Improvement

Every feedback is reviewed in our quality meetings, helping us refine bill of materials, procedures, and service standards.

How It Works:

1. We listen – We record the details (product name, lot number, purchase channel, photos/videos if available).
2. We analyze – Cold chain and quality records are reviewed immediately.
3. We resolve – Replacement, return, or compensation options are offered, and the solution ensures customer satisfaction.
4. We share – The outcome and findings are communicated transparently with the customer.

RETAIL PRODUCTS
